Charles T. Bailey
Commissioner of Public Lands.

DEDICATED to the memory of those noble persons, since departed, who, during those trying times in the 1840's, did much, gave much, made sacrifices and suffered self-denial for the common good, resulting in a legacy to the people of Hawaii of the facility for the acquirement of real estate in Fee Simple, among whom were Kauikeaouli (King Kamehameha III), John Young (Keoni Ana), Mataio Kekuanaoa, A. Paki, Kekauonohi and all the other chiefs; John Ii, William Richards, Gerrit P. Judd, John Ricord, William L. Lee and R. C. Wylle; the members of the Privy Council and the Board to Quiet Land Titles.

FOREWORD

UNDER the system of land tenure in early Hawaii, which was feudalistic, the title to the whole of the land was in The King. There was no such thing as Fee Simple title. King Kamehameha I, who conquered the whole, partitioned the lands among his warrior chiefs, retaining a certain revenue from them. These chiefs did the same to those under them by parcelling out the arable portions among the common people living on their lands, the tenants in turn rendering various services besides cultivating certain parcels of land which they maintained as gardens for their landlords.

With the advent of foreigners and foreign business methods, however, it became apparent that a change in the system of land tenure would have to be made, so, in the early 1840's, land tenure in Hawaii entered a transitional period terminating in the "Great Mahele" of 1848, which furnished the facility for acquirement of real estate in Fee Simple.

This was made possible by The King (Kauikeaouli, King Kamehameha III), who, to his everlasting honor, voluntarily waived and gave up for the common good, all his right to the whole of the lands in Hawaii that it might be, and which was ultimately, divided into three parts—one to the Chiefs, one for the support of the Government, and a third for the King's personal use. These we know by the names of "Konohiki," "Government" and "Crown Lands."

Honor is also due the chiefs, who were parties with The King to the Great Mahele in bringing about its accomplishment, for it required self-denial and sacrifice on their part, to give up what they regarded was theirs, by surrendering to the government certain of their recently acquired lands in lieu of a government commutation, so as to obtain an allodial title in Fee Simple to the remainder of the lands which they retained; and for the further sacrifice which they made, for it was mostly from their one-third of the Great Mahele that the common people, who were their tenants, received title to the small holdings which are known as "Kuleanas." These Kuleanas were areas which these tenants had improved and used for their own purposes.

These Kuleanas were awarded by a Board formed by King Kamehameha III in 1846, called The Board of Commissioners to Quiet Land Titles, which was commonly known during its existence as "The Land Commission." The King's appointees were John Ricord, the Attorney General, as chairman, and William Richards, Zorobabela Kaauwai, James Young Kanehoa and John Ii—two white men, two full blooded Hawaiians, and one half-white. Able men these were, who, in their appreciation of the difficult task before them, drew up a very careful statement of "Principles" to guide their conduct in making awards, which statement of Principles was on October 26, 1846, made law by Legislative Act. Vacancies occurred and were filled from time to time by

appointment by The King of Wm. L. Lee, Namauu, S. M. Kamakau, G. M. Robertson, J. Kekaulahao and Joseph H. Smith, who was also Secretary of the Board. The Land Commission after nine years of conscientious labor, accomplishing a most arduous task, was dissolved in March, 1855.

The Land Commission worked with most commendable energy, going to every part of the Islands to meet the people and prepare for awarding their claims, involving the hearing and taking of testimony in connection with nearly 12,000 individual claims. These awards are of record in ten immense volumes, and the testimony on which they are based is recorded in some fifty odd lesser volumes, all of which are of infinite value to all the interests in the Territory, containing as they do the original title to all lands in the Territory. These volumes have been in continual use by real estate interests for the past 80 odd years.

The key to these volumes, comprising the work of the Land Commission, is contained in two volumes of indices, one containing a listing of all the claims for lands by ahupuaas and ilis on each island, while the other contains all these claims listed numerically. The first volume has been valuable to surveyors as it is arranged by lands which are listed in the order that they adjoin each other, while the numerical one was valuable to searchers of title and in office use. The numerical volume was very large, cumbersome and awkward of handling, as were also the ten volumes of Awards. These were later copied into smaller and lighter volumes, thus preserving the originals from destruction by careless handling. This numerical index, as copied, is a most valuable book, for each claim is referenced, not only to the ten volumes in which all the claims are recorded, but to the fifty odd other lesser volumes as well, which contain the substantiating testimony of these claims.

Much credit is due the Land Commission and its able secretary for their splendid work in recording in these volumes the results of their labors and deliberations on the many land claims filed with them, and for their compilation in index form of the data contained therein, which has enabled interested parties to readily secure the information required.

In 1881 the index prepared by the Land Commission listing the land claims by lands, was printed in a handy little volume. This book has long since been out of print, but it has been of great value to those interested in land titles in Hawaii, and in recent years has been held at a premium.

The data contained in this volume, which is intended to serve the same purpose as the volume published in 1881, just mentioned, was taken from the numerically arranged index of the Land Commission and was checked and re-checked against the volumes containing the awards by the Land Commission. This data was then assembled in the four forms of indices contained herein, which, it is hoped, will be of value to those interested in searching land titles in Hawaii. It may contain mistakes, but it is hoped that these will be minor, and will not impair the value of this volume to the interests it is intended to serve.

The Land Commission made mistakes, to be sure, for theirs was a task of magnitudinous proportions, but when one considers the mass of detail which is ever present in work of this kind, for every one of nearly 12,000 individual

claims, which had their attention, had to be heard, investigated and deliberated on separately, it is surprising that more mistakes were not made. In addition to this there was that other factor contributory to mistakes, haste, for they were aware of the fact that their work required haste, and they labored accordingly, in order to insure completion. There were many exigencies that might have stopped and undone all that had been accomplished, as, for instance, the death of a progressive ruler in entire sympathy with the work of the commission and the succession of one less liberal and helpful. Thus it is seen that any injustice caused by mistakes of the commission was unavoidable under the circumstances, and their mistakes or sins, if they may be called such, were sins of omission rather than of commission, and are being gradually corrected as they come to light.

For the benefit of those interested in land matters in early Hawaii, reference is made to the following ably written papers on this subject, prepared by well-informed men.

“Brief History of Land Titles in the Hawaiian Kingdom,” by W. D. Alexander, published as an appendix to the Surveyor General’s Report in 1882, and reprinted in Thrum’s Annual for 1891.

“Land Matters in Hawaii,” by Curtis J. Lyons, published in the *Islander* in 1875, and reprinted in the Report of the Surveyor of the Territory of Hawaii for 1902.

“A History of the Hawaiian Government Survey, with Notes on Land Matters in Hawaii,” by Curtis J. Lyons, published in 1903.

“Land Titles and Surveys in Hawaii,” by Arthur C. Alexander, read before the Honolulu Social Science Association, March 1, 1920, and reprinted by the Hawaiian Planters’ Record for August, 1920.

Frequent reference to the above document by Arthur C. Alexander has been made in preparing this “Foreword.”

A few brief statements follow explaining some of the words appearing in the volumes of the Land Commission pertaining to division of lands.

MOKU The Islands were each divided into districts called “Mokus.” These seem to have been geographical subdivisions only, for there were no administrators over these Mokus, as districts.

KALANA The district next smaller than a Moku was called “Kalana.”

AHUPUAA Each Moku was divided, for landholding purposes, into smaller divisions called “Ahupuaas,” varying in size and shape. The typical form of an Ahupuaa was a strip running from the sea to the mountains and containing a sea fishery and sea beach, a stretch of kula or open cultivatable land and higher up its forest. All Ahupuaas had definite boundaries, usually of natural features, such as gulches, ridges and streams, and each had its specific name. A chief held it, not owned it, for he owed allegiance to a higher chief or the sovereign.

ILI

Many of the Ahupuaas were subdivided into smaller lands called "Ilis." Each had its own individual title and was carefully marked as to boundary.

ILI KUPONO

There were two kinds of Ili, one, the "Ili Kupono," known also in abbreviated form as "Ili Ku," being a portion of land, the ownership of which was fixed, for the chief holding an Ili Kupono continued to hold, whatever the change in the Ahupuaa chief. In other words, the transfer of an Ahupuaa to a new chief did not carry with it the transfer of any Ili Kupono contained within its limits.

ILI OF THE AHUPUAA

The other Ili was the "Ili of the Ahupuaa." Ilis of the Ahupuaa were subdivisions for the convenience of the chief holding the Ahupuaa.

LELE

Another feature of the Ili is that an Ili often consisted of several distinct sections of land, one, for instance, would be on the sea shore, another in dry, open land or kula, another in the regularly terraced and watered taro patch section, and still another in the forest section. These detached pieces were called "Leles."

MOO

The arable portions of Ilis were divided into small tracts or fields called "Moos" or "Mooainas." A Moo was the division of land next less than an Ili and was for the purpose of cultivation only. These Moos were named, which were in reality field names.

PAUKU

The division of land next less than a Moo was called "Pauku."

KIHAPAI

Still smaller than a Pauku was a division called "Kihapai." This was a cultivated patch of ground, a field, a potato patch or garden belonging to and cultivated by the tenants or common people for themselves. These also had their names.

KOELE

There were also patches and gardens which were planted by the tenants, or common people, for their landlords. These were called "Koeles." These belonged to the chief but cultivated for him by his people, and these also had their names.

POALIMA

These Koeles in later years were worked for the chiefs by the tenants on Fridays only, and they then came to be called "Poalimas," poalima being the Hawaiian word for Friday.

KULEANAS

The small areas of an Ahupuaa which the tenants, or common people, had improved or cultivated and used for their own purposes, and to which they substantiated their claims and per-

feeted their rights, securing from the Land Commission an Award of Title in Fee Simple, were known as "Kuleanas." The word itself means "rights"—a right of property which pertains to an individual—and was applied uniformly during the existence of the Land Commission to the Fee Simple holdings awarded by it to the common people.

KONOHIKI

The head man of an Ahupuaa or a person who had charge of a land with others under him was called a "Konohiki." He was an agent who managed a chief's lands. The word Konohiki in time came to be applied to the land under such an agent's care, thus the land held by a chief, an Ahupuaa or Ili, was known as "Konohiki Land."

**AN ACT TO ORGANIZE THE EXECUTIVE DEPARTMENTS OF THE
HAWAIIAN ISLANDS.**

(Pt. 1, ch. VII, art. IV; April 27, 1846.)

**ARTICLE IV.—OF THE BOARD OF COMMISSIONERS TO QUIET
LAND TITLES.**

SEC. 1. His Majesty shall appoint through the minister of the interior, and upon consultation with the privy council, five commissioners, one of whom shall be the attorney general of this kingdom, to be a board for the investigation and final ascertainment or rejection of all claims of private individuals, whether natives or foreigners, to any landed property acquired anterior to the passage of this Act; the awards of which board, unless appealed from as hereinafter allowed, shall be binding upon the minister of the interior and upon the applicant.

**PRINCIPLES ADOPTED BY THE BOARD OF COMMISSIONERS TO
QUIET LAND TITLES IN THEIR ADJUDICATION OF CLAIMS
PRESENTED TO THEM.**

When the islands were conquered by Kamehameha I., he followed the example of his predecessors, and divided out the lands among his principal warrior chiefs, retaining however, a portion in his hands, to be cultivated or managed by his own immediate servants or attendants. Each principal chief divided his lands anew, and gave them out to an inferior order of chiefs, or persons of rank, by whom they were subdivided again and again; after passing through the hands of four, five or six persons, from the King down to the lowest class of tenants. All these persons were considered to have rights in the lands, or the productions of them. The proportions of these rights were not very clearly defined, but were nevertheless universally acknowledged.

The tenures were in one sense feudal, but they were not military, for the claims of the superior on the inferior were mainly either for produce of the land or for labor, military service being rarely or never required of the lower orders. All persons possessing landed property, whether superior landlords, tenants or sub-tenants, owed and paid to the King not only a land tax, which he assessed at pleasure, but also, service which was called for at discretion, on all the grades from the highest down. They also owed and paid some portion of the productions of the land, in addition to the yearly taxes. They owed obedience at all times. All these were rendered not only by natives, but also by foreigners who received lands from Kamehameha I. and Kamehameha II., and by multitudes still alive; of this there are multitudes of living witnesses, and a failure to render any of these has always been considered a just cause for which to forfeit the lands.

It is therefore certain that the tenure was far from being allodial, either in principle or practice; but even if living testimony were wanting at the present time, the treaty established in 1836, between this government and Lord Edward Russell on behalf of the British government, would show the

views then entertained on the subject by the contracting parties. It is there declared, "The land on which the houses are built is the property of the King." The same rights which the King possessed over the superior landlords and all under them, the several grades of landlords possessed over their inferiors, so that there was a joint ownership of the land; the King really owning the allodium, and the person in whose hands he placed the land, holding it in trust. But when he put it in the hands of a third person, that third person bore a similar relation to him that he did to the King. The superior always had the power at pleasure to dispossess his inferior, but it was not considered just and right to do it without cause, and dispossession did not often take place, except on the decease of one of the landlords, when changes were often numerous, and the rights of heirs and tenants comparatively disregarded, for the purpose of favoring a new class of persons.

Such was the nature of the tenures, and such the titles by which the lands were held, when in 1839 protection was declared both for person and property, in the following words: "Protection is hereby secured to the persons of all the people; together with their lands, their building lots, and all their property." (See Declaration of Rights, p. 10 of translation.) In section 6 of the same act, p. 33, the nature of the protection given to landed property is in some degree defined. It is there declared that the landlord cannot "causelessly dispossess his tenant," and it is also stated what shall be considered a sufficient cause. The same law confirms what has been already stated in relation to the rights of His Majesty the King in all lands. Section 3 requires that every tenant of land, by whomsoever owned, shall work 36 days in the year for the King or government, showing clearly that there is no individual who has an allodial title to the soil, the title remaining with the King.

It seems natural then, and obviously just, that the King, in disposing of the allodium, should offer it first to the superior lord, that is to the person who originally received the land in trust from the King; since by doing so, no injury is inflicted on any of the inferior lords or tenants, they being protected by law in their rights as before; and most obviously the King could not dispose of the allodium to any other person without infringing on the rights of the superior lord. But even when such lord shall have received an allodial title from the King by purchase or otherwise, the rights of the tenants and sub-tenants must still remain unaffected, for no purchase, even from the sovereign himself, can vitiate the rights of third parties. The lord, therefore, who purchases the allodium, can no more seize upon the rights of the tenants and dispossess them, than the King can now seize upon the rights of the lords, and dispossess them. This appears clear, not only from the first principles of justice, but also from the act of 1839, declaring protection for tenants as well as for landlords. That act particularly recognizes but three classes of persons as having rights in the sale, viz: The King or government, the landlords and the tenants. Indeed, section 9, chapter 3 of that statute positively forbids the lord who receives land in trust from the King to place another lord under himself, over the tenants. If then any

landlord violate this law, he only divides his own rights; he cannot thereby diminish the rights of the King or government, nor the rights of the tenants.

It being therefore fully established, that there are but three classes of persons having vested rights in the land,—1st, the government, 2nd, the landlord, and 3rd, the tenant, it next becomes necessary to ascertain the proportional rights of each. Happily, evidence on this point is not wanting, though it may be the most difficult one to settle satisfactorily of any connected with land claims. The testimony elicited is of the best and highest kind. It has been given immediately by a large number of persons, of a great variety of character, many of them old men, perfectly acquainted with the ancient usages of the country; some were landlords, and some were tenants. There has been no contradictory testimony, but all have agreed on all essential points. Several foreign landholders under Kamehameha I., Kamehameha II. and Kamehameha III. have been full in their testimony as to the rights of the King. Ancient practice, according to testimony, seems to have awarded to the tenant less than justice and equity would demand, and to have given to the King more than the permanent good of his subjects would allow. If the King be disposed voluntarily to yield to the tenant a portion of what practice has given to himself, he most assuredly has a right to do it; and should the King allow to the landlord one third, to the tenant one third, and retain one third himself, he, according to the uniform opinion of the witnesses, would injure no one unless himself; and in giving this opinion, the witnesses uniformly gave it against their own interests. According to this principle, a tract of land now in the hands of a landlord and occupied by tenants, if all parts of it were equally valuable, might be divided into three equal parts, and an allodial title to one then be given to the lord, and the same title be given to the tenants of one third, and the other one third would remain in the hands of the King, as his proportional right. It is altogether probable that since the act of 1839, a few individuals may have acquired allodial ownership of landed property, either by purchase or by voluntary grant on the part of the King. Such ownership must be proved or it cannot be acknowledged; for the King, representing the government, having formerly been the sole owner of all the soil, he must be considered to be so still, unless proof be rendered to the contrary; and even possession of ever so long standing cannot be proof, any thing more than that which is specified above as belonging to the landlord, or to the landlord and tenant, as the case may be.

All the above principles and remarks apply most particularly and clearly to districts, plantations and farms, and to their owners. But between the ownership of lands for cultivation, and mere building lots, there are often broad lines of distinction. Mere building lots were never bestowed by the King or lords for the purpose of being given out to tenants, as was uniformly the case with lands suitable for cultivation. It follows therefore, that (with some exceptions, which in all cases must be proved) in relation to building lots, there is no third class of persons having the rights of lords over tenants. The exceptions would be in those cases where individuals having received building lots from the King for their own particular use, those in-

dividuals have themselves for some considerations, expressed or implied, transferred such lots to third parties. Another exception exists in relation to building lots, especially if large, which were formerly within the defined boundaries of plantations and farms, and have since been occupied by persons owning no rights in the farms other than the building lots. Such lots must still be considered a part of the plantation or farm, in such a sense that the tenant must pay rent to the lord. This appears clear, not only from ancient usage, but also from the last clause of section 7, of chapter 3, old laws: "But possessions [possessor] of house lots that are large like farm gardens, must aid the owners of the farms from which they are taken, in payment of the yearly tax."

Although the above facts and principles are most perfectly clear and unquestionable, yet great evils have existed down to the present moment, owing mainly to the circumstance that several different classes of persons had undivided rights in the same lands, and each class was very liable to claim more than the due proportions. In such cases, lords, or persons of superior power or rank have generally been the oppressors, and perhaps there are none of those classes, from the throne down, who have not sometimes taken advantage of the powerless in this respect. Neither the laws of 1839 nor of 1840 were found adequate to protect the inferior lords and tenants, for although the violators of law, of every rank, were liable to its penalty, yet it was so contrary to ancient usage, to execute the law on the powerful for the protection of the weak, that the latter often suffered, and it was found necessary to adopt a new system for ascertaining rights, and new measures for protecting those rights when ascertained, and to accomplish this object the Land Commission was formed.

The decisions of an executive board would be so far surrenders of the Chief Executive Magistrate, who has approved the powers conferred upon that Board, as to be an authorization from him to adjust all the past tenures in the manner most equitable, and if abstractly just, power to alienate for him any rights, which he as King could surrender in regard to these lands. The whole power of the King to confer and convey lands to which private equitable claim now attaches, is reposed in the Commission. What is the nature and extent of that power which the King has bestowed upon this Board? It can be no other than his private or feudatory right as an individual participant in the ownership, not his sovereign prerogatives as head of the nation. Among these prerogatives which affect lands, are the following:

- 1st. To punish for high treason by forfeiture, if so the law decrees.
- 2nd. To levy taxes upon every tax yielding basis, and among other lands, if so the law decrees.
- 3rd. To encourage and even to enforce the usufruct of lands for the common good.
- 4th. To provide public thoroughfares and easements, by means of roads, bridges, streets, etc., for the common good.
- 5th. To resume certain lands upon just compensation assessed, if for any cause the public good or the social safety requires it.

These prerogatives, powers and duties, His Majesty ought not, and ergo, he cannot surrender. Hence the following confirmations of the board, and the titles consequent upon them must be understood subject to these conditions.

But the King's private or feudatory rights, understood by the natives, differ greatly from the above enumerated corporate rights, understood in civilized and refined nations, and in which the commonwealth is rather represented by the person of the monarch than the monarch himself. By the ancient usage, the taxes went not to the body corporate, in trust for political uses, but to the King, as his private income or revenue, and this gave him a private proprietorship in all lands. This autocracy was, however, diminished by the King's liberal and voluntary surrender to his people in the Constitution, 8th October, 1840, in which the government or body politic and the King are for the first time contradistinguished as follows: "He (the King) also shall have the direction of the government property, the poll tax, the land tax, the three days monthly labor, though in conformity to the laws. He also shall retain his own private lands, and lands forfeited for the non-payment of taxes shall revert to him," in which clause is perceivable the line of distinction above adverted to. All that is essential to the common good in regard to lands, taxes on lands, and revenue from lands, is reposed in the King, as the head of a corporation aggregate; or in himself as a corporation sole, and from these is contradistinguished his own private lands.

In the spirit of this constitutional distinction, on the 7th of June, 1839, the Nobles, with the sanction of the King, passed some ordinances or rules "respecting applications for farms, forsaking of farms, disposing of farms, and the management of farms," having in view the encouragement of industry. In these the landlords are recognized as a distinct and independent class of local proprietors over such portions of their lands as are actually in cultivation, subject to the claims of their tenantry; and as to those lands not in actual use, it gives a community of ownership between the government and landlords, by saying, "Those men who have no land, not even a garden, nor any place to cultivate, and yet wish to labor for the purpose of obtaining the object of their desires, may apply to the land agent, or the governor, or the King, for any piece of land which is not already cultivated by another person, and such piece shall be given him."

This appropriation was to be with co-operation of the King and the landlords. In like manner the corporate right is recognized in what the same law declares respecting the "residuum lands," and "respecting landlords."

Yet the principle of suzerainship seems to have followed the King in those lands which are otherwise declared to be the proper possession of the landlords: for the "advice to the governors and landlords" commences with, "It shall be the duty of those to whom the King gives lands to see that they do not establish other landlords under themselves, over the people;" and in the 18th section, landlords are cautioned lest they "be dispossessed, according to the principles of the eleventh section," which makes the landlords' right of possession dependent upon industry and intelligence.

It would thus seem inferable, that as late as the 7th of June, 1839, and before the Constitution was given, the chiefs considered themselves tenants at special will of the King as the head of the nation, or in his corporate right. Also that that corporate right to dispossess them was only to be exercised for causes of a public nature, inconsistent with the public well being. To suppose that the landlords could be lawfully dispossessed by the King at will, for causes of private pique, or because of personal disfavor, would be to make the King the real or intrinsic owner of the land in his individual capacity, a doctrine neither sustained by the current of past legislation, nor the testimony which has already been elicited by the Board. But to recognize his right of forfeiting the lands of the landlords for misuser or non-user, or for crime, is itself a recognition beneficial to the mass of the people, for whose happiness the corporation is instituted.

The Hawaiian rulers have learned by experience, that regard must be had to the immutable law of property, in things real, as lands, and in things personal, as chattels; that the well being of their country must essentially depend upon the proper development of their internal resources, of which land is the principal; and that in order to its proper cultivation and improvement, the holder must have some stake in it more solid than the bare permission to evolve his daily bread from an article, to which he and his children can lay no intrinsic claim. They perceive by contact with foreign nations, that such is their uniform practice, and that the rules of right under that practice are contended for, understood and likely to be applied, in regard to the lands otherwise held at their hands by a tenancy incomprehensible to the foreigner. They are desirous to conform themselves in the main to such a civilized state of things, now that they have come to be a nation in the understanding of older and more enlightened governments.

Such we the commissioners understand to have been the reason of the distinction in the Constitution of 1840, between government lands and private lands of the King, and such we now understand to be the spirit of article 4th, chapter 7th, of the first part of the Act to organize the executive departments of the Hawaiian Islands, founded upon the Law Report of May 21, 1845, in which it was recommended to prepare His Majesty's government to consort in some measure with the recognizing powers. In consequence, it was enacted that the King is to appoint five commissioners for quieting land titles, and thus confer upon them all his private and public power over the corporate property in lands claimed by private parties, which in the nature of things he can delegate.

The requisition to appoint such a board is found in the fourth article of the 7th chapter of the first part of an Act of the Legislature, passed on the 10th of December, 1845, which took effect on the 7th of February following. The statute of which said article is a part, is as a whole denominated "An Act to organize the Executive Departments," indicating that the decisions of the board are not purely judicial, but executive adjudications. The Act as a whole in five parts, passed its final reading and re-

ceived the approbation of His Majesty, on the 27th of April, 1846, and was promulgated on the 20th June following.

The Board of Commissioners thus instituted, was organized in strict conformity with the law, which having taken effect on Saturday, the 7th of February, the Minister of the Interior, on Monday, the 9th, in Privy Council, with the approbation of His Majesty, appointed and commissioned the undersigned, who at the same time in the presence of the King and Council, took and subscribed the following oath of office:—

“We, and each of us, do solemnly swear, that we will carefully and impartially investigate all claims to land submitted to us by private parties against the government of the Hawaiian Islands; and that we will equitably adjudge upon the title, tenure, duration and quantity thereof, according to the terms of article 4th of the 7th chapter of the first part of an Act entitled ‘An Act to organize the Executive Departments of the Hawaiian Islands,’ passed at Honolulu, the 10th day of December, 1845.

Which resolutions were published in the Polynesian of the 14th February, 1846, together with the following notice, required by law:

“To All Claimants of Lands In The Hawaiian Islands.

“The undersigned have been appointed by His Majesty the King, a Board of Commissioners to investigate and confirm or reject all claims to land arising previously to the 10th day of December, A. D. 1845.

“Patents in fee simple, or leases for terms of years, will be issued to those entitled to the same, upon the report which we are authorized to make by the testimony to be presented to us.

“The Board holds its stated meetings weekly, at the Hale Kauwila, in Honolulu, on the Island of Oahu, to hear the parties or their counsel in defense of their claims, and is prepared every day to receive in writing the claims and evidences of title which parties may have to offer, at the office of Joseph Henry Smith, Esq., Secretary of said board, at Hale Kauwila, in Honolulu, between the hours of 9 A. M., and 3 P. M.

“All persons are required to file with the Board by depositing with its Secretary specifications of their claims to land, and to adduce the evidence upon which they claim title to any land in the Hawaiian Islands, before the expiration of two years from this date; or in default of so doing, they will after that time be forever barred of all right to recover the same in the courts of justice.

“Dated 11th day of February, 1846.

1st. The field of the Commissioners is "the investigation and final ascertainment or rejection of all claims of private individuals, whether natives or foreigners, to any landed property acquired anterior to the passage of the Act" of which Article 4th is an integral portion, to wit, 27th April, 1846.

2nd. The more minute powers of the Board for organization, and to carry out these objects, are specified and conferred; as the power to meet and adjourn, to appoint clerks, to summon parties and enforce mandates, to administer oaths, and to issue commissions for taking testimony. These are auxiliary to the powers and objects of the Board respecting land titles, which it is created to confirm or reject definitely.

3rd. The principles by which the Board are to be governed in deciding certain questions, (i. e.) "Prescription occupancy, fixtures, native usages in regard to landed tenures, water privileges and rights of piscary, the rights of women, the rights of absentees, tenancy and subtenancy, primogeniture, and the rights of adoption," are to be those "Established by the civil code of the kingdom," which the general provisions of the Act to organize the Executive departments, section 3rd, defines as follows: "Until the passage of the civil code, the principles of the foregoing Act, and the prescriptions of all the civil statutes now existing, not at conflict therewith, shall serve and be binding as a civil code for this kingdom, of which the courts of justice shall take notice, in administering the rights to which they are applicable."

A wide latitude is thus left to the Commissioners, who must, in passing upon the merits of each claim, first elicit from creditable witnesses, the fact or history of each; and thus assort or reconcile those facts to the provisions of the civil code, whenever there is a principle in past legislation applicable to the point under consideration; but when no such principle exists, they may judicially declare one, in accordance with ancient usage and not at conflict with any existing law, nor at variance with the facts, and altogether equitable and liberal.

4th. From the fact that His Majesty, the intrinsic proprietor, has reposed in this Board, such power of confirming or rejecting, the Commissioners must infer that he intended the utmost liberality to prevail towards the claimants, rather against the pecuniary interests of the body politic than against those of claimants. But,

5th. The Commissioners do not understand that in virtue of such latitude, they are at liberty to disregard certain restrictions contained in the same Act, by the 4th Article of the 7th chapter of the first part of which they are created. For the same legislature by whose authority they exist, has elsewhere limited them as follows:

1st. Aliens are not allowed to acquire any allodial or fee-simple estate in lands.

2nd. No leasehold estate shall be considered validly acquired by any alien "until he shall have obtained a certificate of nationality, as in this" the first article of chapter 5th required.

6th. The Commissioners are only authorized by the Act to ascertain

the claimant's kind and amount of title, and to ward for or against that title, "wholly or in part."—They are not authorized to grant leases or patents, or to receive the commutation allowed by section 10th. Yet since the government share in the land confirmed has intimate connection with the amount of the claimant's title, the Commissioners must ascertain and report upon that share, for the guidance and information of the Minister of the Interior.

7th. Connected with each claim for land, is its configuration and superficial contents, without the ascertainment and demarkation of which, it were impossible to make an award, or to quiet the title as between neighboring proprietors. The Board is therefore under the necessity of causing each piece of land to be surveyed at the claimant's expense, before awarding upon it. This is clearly contemplated by the 12th section of the law, among the "expenses incidental to the proposed investigation."

The following benefits will result from these investigations and awards:—

1st. They will separate the rights of the King and Government, hitherto blended, and leave the owner, whether in fee, or for life, or for years, to the free agency and independent proprietorship of his lands as confirmed. So long as the King or Government continue to have an undivided proprietary share in the domain, the King's and Premier's consent is necessary, by the old law, to real sales, or transfers from party to party, and, by parity of reasoning, to real mortgages also. This is because of the share which Government or the body politic has in the lands of the kingdom uniformly. To separate these rights, and disembarrass the owner or temporary possessor from this clog upon his free agency, is beneficial to that proprietor in the highest degree, and also the body politic; for it not only sets apart definitely what belongs to the claimant, but untying his hands, enables him to use his property more freely, by mortgaging it for commercial objects, and by building upon it, with the definite prospect that it will descend to his heirs. This will tend more rapidly to an export, and to a permanency of commercial relations, without which, there can never be such a revenue as to enable the Government to foster its internal improvements.

2nd. The patents or leases given to claimants, are for certain fixed and ascertained extents or dimensions of land. This must prevent after litigation in regard to boundaries. All parties having been cited before awarding, there can be no counter claims to the same piece of land after award, except on appeal, and such appeal cannot be taken, except by a party who has presented his claims to the Board.

The patents and leases are recorded in duplicate, in the Department of the Interior. This will enable the foundation of every one's right to be known to the Government, and inquiring parties. No pretended ownerships can exist without the means of undeceiving the public in regard to them. Subsequent purchasers and mortgagees need not be in ignorance of prior defects in the title, or of prior incumbrances.

The undersigned deem the foregoing prefatory remarks and explanations necessary to a clear understanding of the awards upon which they are

about to enter, and indispensable to which awards, it is necessary to lay down the following general principles, to which they have arrived by critical study of the civil code, and careful examination of numerous witnesses; among whom are some of the oldest chiefs, possessing large tracts of land, which, equally with other lands, come under the adjudication of the Board, and under the principles here laid down.

The chiefs so situated, cannot have a personal interest in testifying to the facts leading to these principles, since they thereby clog their own rights, and become liable to pay the commutation to which the King and Government are entitled. Native proprietors and foreign residents are thus put upon the same footing in regard to their titles, in consistency with Article 2nd of the treaties concluded with Great Britain and France, 26th March, 1846.

1st. For the purposes of this Board in all cases where the land has been obtained from the King or his authorized agent without a written voucher, anterior to the 7th of June, 1839, the Board will inquire simply into the history of the derivation; and if the land claimed has been continuously occupied, built upon, or otherwise improved since that time, without molestation, the Board will, in case no contests exist between private claimants, infer a freehold less than allodial.

2nd. In all such cases as above specified, when there are counter claims to the same piece of land, the Board will confine their inquiry to which of the claimants has the freehold, less than allodial.

3rd. In all cases where the land has been obtained from the King or his authorized agent, or from any governor, chief, or pretended proprietor, subsequent to the 7th of June, 1839, the Board will strictly inquire into the right of the King, or chief, or landlord, to make such disposition of the land; and will confirm or reject, according to the right of such donor, grantor, or lessor, regardless of consideration, occupancy or after improvements.

4th. In all cases where the land has been legally and validly obtained from the lawful proprietor, by written grant, deed, or lease, the Board will construe the claimant's rights by the wording of the instrument.

5th. When rights were originally acquired either in writing or verbally, in a lawful manner, and from the bona fide owner, for a valid consideration or otherwise, and yet were never occupied, or have not been occupied by such claimant since the 7th of June, 1839, the Board will infer an absence of title. Especially in view of section 6, chapter 3, old law.

6th. The share of government, or the body politic, to be commuted for with the Minister of the Interior, by any confirmed claimant wishing to obtain a fee simple title under chapter 7 of part first of the Act to organize the Executive Departments, this Board understands, from the evidence adduced before them, to be one third part of the value of the land, without improvements, which third part of unimproved value, being paid by the confirmed claimant, should extinguish the private rights of the King in the land, and leave such claimant an allodium, subject only to the corporate rights of the body politic, to be exerted by the King under authorization of

the laws, and through the agency of his officers created by the laws. The Board, in asserting this principle, do not mean however to restrict the power of His Majesty in Privy Council, to fix upon a less commutation, under section 10th of the article creating this Board, and subject to the private rights of tenants, if there be any on the land; for the King has no power to convey away the rights of individuals without their consent. They deem it their duty to state the maximum value of the interest retained in all lands of the kingdom at this date, which was never relinquished, and which the government to this day has never received any valuable consideration for, even from the private chiefs from whom the claimants derive. Claimants cannot derive more than the original proprietor had, neither could the original proprietors grant more than they had to the present claimants. They had a possessory right under the crown, equal to two thirds undivided of the value of the land, provided there were no tenants; and in consideration of the undivided third of the King, they paid an annual rent, in produce of the soil, and in service. The foreign claimants, deriving from these, have not, in all cases, paid the rent which was due from their grantors, and have lost sight of the corporate rights in their lands, pertaining originally to the government. That rent can be sold by the Minister of the Interior, for not exceeding one third of the unimproved value of the land as aforesaid, which would divest the land so commuted for of all interference, save that of the community, for the causes and in the way aforesaid.

7th. The titles of all lands, whether rightfully or wrongfully claimed, either by natives or foreigners, in the entire kingdom, which shall not have been presented to this Board for adjudication, confirmation or rejection, on or before the 14th day of February, 1848, are declared to belong to this government, by section 8th of the article creating this Board. Parties who thus neglect to present their claims, do so in defiance of the law, and cannot complain of the effect of their own disobedience.

Upon these principles, the undersigned proceed to take up the claims now before them in the order of their presentation.

AN ACT FOR THE RELIEF OF CERTAIN KONOHIKIS.

L. 1854, p. 25; C. C. p. 416.

WHEREAS, certain Konohikis who received lands from His Majesty, at the great division of lands, in the year 1848, did, from accidental causes, fail to present their claims to such lands to the board of commissioners to quiet land titles, within the time allowed by law and have, in consequence, been barred, Therefore:

BE IT ENACTED, By the King, the Nobles and Representatives of the Hawaiian Islands, in Legislative Council assembled:

SEC. 1. That any Konohiki who received land from the King, at the division of lands in the year 1848, and who failed, from any cause whatsoever, to present his claim for such land to the board of commissioners to quiet land titles, previous to the 14th day of February, A. D. 1848, may present his claim for such land to the said board of commissioners, at any time previous to the first day of November next ensuing; and the said board of commissioners are hereby authorized to receive, hear, and determine all claims that may be presented to them under the foregoing provisions, in like manner, as if such claims had been presented to them previous to the 14th day of February, A. D., 1848.

SEC. 2. This act shall take effect and become a law from and after the date of its passage.

Approved, August 10th, 1854.

**AN ACT FOR THE RELIEF OF CERTAIN KONOHIKIS, WHOSE NAMES
APPEAR IN THE DIVISION OF LANDS FROM KAMEHAMEHA III.
L. 1860, p. 27.**

WHEREAS, certain Konohikis who were entitled to lands under the division of 1848, have for various causes failed to obtain their awards from the Land Commission within the time specified by law, and for that reason are destitute: Therefore,

BE IT ENACTED, By the King, the Nobles and Representatives of the Hawaiian Islands, in Legislative Council assembled:

SEC. 1. The Minister of the Interior is hereby authorized to grant awards for their lands to all konohikis who have failed to receive the same from the Land Commission: Provided that the names of such konohikis appear in the Mahele Book of the year 1848; and all awards so granted by said Minister shall be equally valid with those of the Land Commission.

SEC. 2. The said Minister may appoint two deputies, his first and second clerks, to hear and decide upon all applications by such konohikis. Said deputies shall keep a book for record, in like manner as the Land Commission, and all fees as mentioned in section 4, shall be paid over for the benefit of the Royal Exchequer. The Minister of the Interior shall be responsible for all the official acts of his said deputies.

SEC. 3. The said Minister, or his deputies, shall cause a notice to be published continually, either in the native newspaper or in the Polynesian, calling upon all konohikis, their heirs, executors and administrators, to present their claims on or before the last day of June, 1862; and if any such person shall fail to present their claim within said specified time, he shall be forever barred, and his right under the Mahele Book shall revert to the Government.

SEC. 4. Said awards so granted shall be in the nature of titles less than allodial, subject to commutation for the Government right therein, as is the case with lands in Honolulu, Lahaina and Hilo, and may be described by survey, or by the natural boundaries, in accordance with the provisions of section 1 of "An Act relating to land titles of Konohikis," approved on the 19th day of June, 1852; the parties receiving such awards shall pay all expenses of the hearing, publication and decision thereof.

SEC. 5. This Act shall not be construed to conflict with any award of the Commission to quiet land titles, granted by actual survey of the boundaries.

SEC. 6. This Act shall take effect from and after the date of its passage, and all laws and parts of laws in contravention thereof are hereby repealed.

Approved this 24th day of August, A. D. 1860.

100,000.....	Square links.....	pauku kuea
43,560.....	Square feet.....	kapual kuea
4,840.....	Square yards.....	iwilei (i-a) kuea

160.....	Square rods.....	roda kuea
10.....	Square chains.....	kaulahao kuea
4.....	Square roods.....	ruda kuea

NOTE:—Owing to the frequent use of tapes measuring 50, 75 and 100 feet in length by some of the “old-time” surveyors, instead of the standard chain of 100 links or 66 feet, much difficulty is now found in checking up areas of lands, the metes and bounds of the descriptions of which are given in chains of such varying lengths.

* Originally the term "huina-ha-like"—(united four equal sides) was used to mean a "square." "Kueba" is now generally used instead.

§ The term "stadia"—"setadia" was used in "square measure" when surveying was first taught in Lahainaluna in 1843. Literally "stadia" means a lineal measure of varying lengths according to the standard adopted by the countries using it.

† A "yard of land" a yard wide, also means a quarter of any of the acres in a "hide." Originally, the term was used to designate the area of land that can be plowed in a given time by a team of oxen in England.

‡ A "hide of land" was the area included within a strip of a bullock's hide, and originally used as the ordinary unit of land in England, because considered requisite for the support of a family.

The term "hide" and "yard" of land were used here in Hawaii by the early English settlers.
